

School Council Trip

The school councillors were part of the consultation on the Joint Strategic Needs Assessment at City Hall

The School Council met with the Leicester City Youth Service team at City Hall on Thursday 10th March 2016.

The meeting was to discuss the development of health services for children and young people across the City.

The children expressed their ideas on what makes a happy and a healthy citizen, how school, families, facilities, food and the environment can help with this and how people can live together to improve it. The children expressed their views using a number of ways including decorating a model citizen, writing thought bubbles which encompassed these ideas and creating a poster.

These ideas were collated by the Youth Services Team for future events and all the councillors were awarded with a certificate and a goodie bag.

Children's thought bubbles on what you need to live a healthy lifestyle

Children's wall full of 'happy' citizens. The children were asked to write about what makes a citizen of Leicester happy and why.

The children created their own anti-bullying posters and how they can remain healthy
